

let's make a FLOWER PORTRAIT!

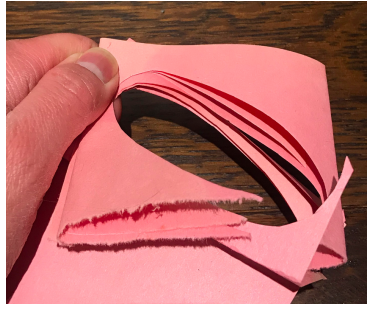

you'll need:

- our flower template OR
- colorful paper
- scissors
- a glue stick
- tape
- a pipe cleaner, a pencil, or a chopstick—something to work as the STEM
- a picture of yourself!

steps:

1. Cut out the flower petals: you can cut them out one by one, or you can cut out one, lay it on top of paper that you've folded five times (so there are six layers!) and cut out all the petals at the same time.
2. Glue the bottom of one petal onto the bottom of another and keep going. Fan them out in a circle!
3. Cut out your picture in a circle and glue it onto the middle of the flower.
4. Tape a pipe cleaner, a pencil, or a chopstick to the back of your flower.
5. Put your creation in a pot, cup, or vase filled with dirt, rice, or marbles. All done!

FLOWER PETALS

Color and cut out these petals, or cut one out and use it as a template by tracing it onto some colorful paper!
